

The image is a collage of three photographs of windows. The leftmost photo shows a window with a wooden frame, with bright sunlight streaming through, creating a lens flare effect. The middle and right photos show windows with white frames, some of which are open, revealing multiple glass panes. The text 'Multi-Cavity Insulating Glass Units' is overlaid in white, bold, sans-serif font across the center of the collage.

Multi-Cavity Insulating Glass Units

LEARNING OBJECTIVES

1. List at least three key drivers that lead to the selection of multi-cavity glazing.
2. Identify two design and construction advantages of multi-cavity glazing.
3. Understand three challenges of multi-cavity glazing constructions vs. double glazed.
4. Select the correct multi-cavity construction to meeting desired performance characteristics.

OUTLINE

- Introduction
- Drivers to selection
- Design, challenges and benefits
- Multi-cavity IG options and considerations
