COMMITTEE**

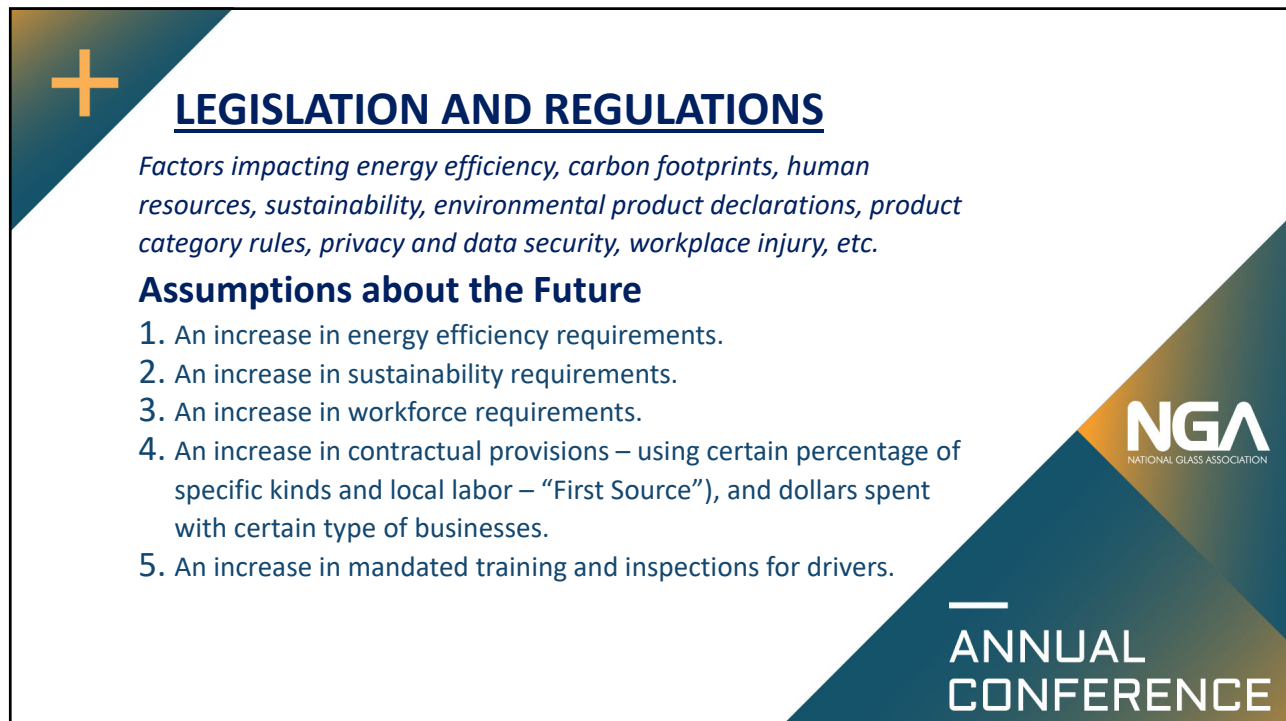

ANNUAL CONFERENCE

JANUARY 22, 2019

PRESENTED BY: PAUL BUSH, VITRO ARCHITECTURAL
PRODUCTS

NGA
NATIONAL GLASS ASSOCIATION

1

+ **LEGISLATION AND REGULATIONS**

Factors impacting energy efficiency, carbon footprints, human resources, sustainability, environmental product declarations, product category rules, privacy and data security, workplace injury, etc.

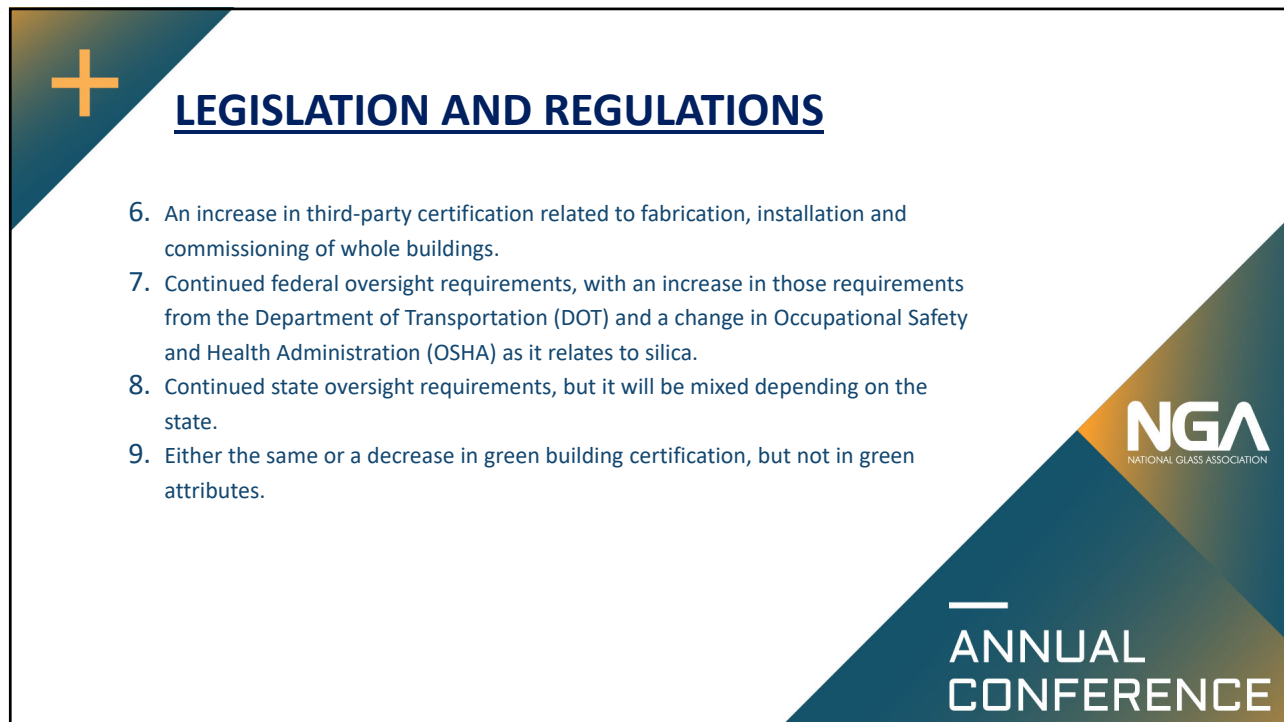

Assumptions about the Future

1. An increase in energy efficiency requirements.
2. An increase in sustainability requirements.
3. An increase in workforce requirements.
4. An increase in contractual provisions – using certain percentage of specific kinds and local labor – “First Source”), and dollars spent with certain type of businesses.
5. An increase in mandated training and inspections for drivers.

2

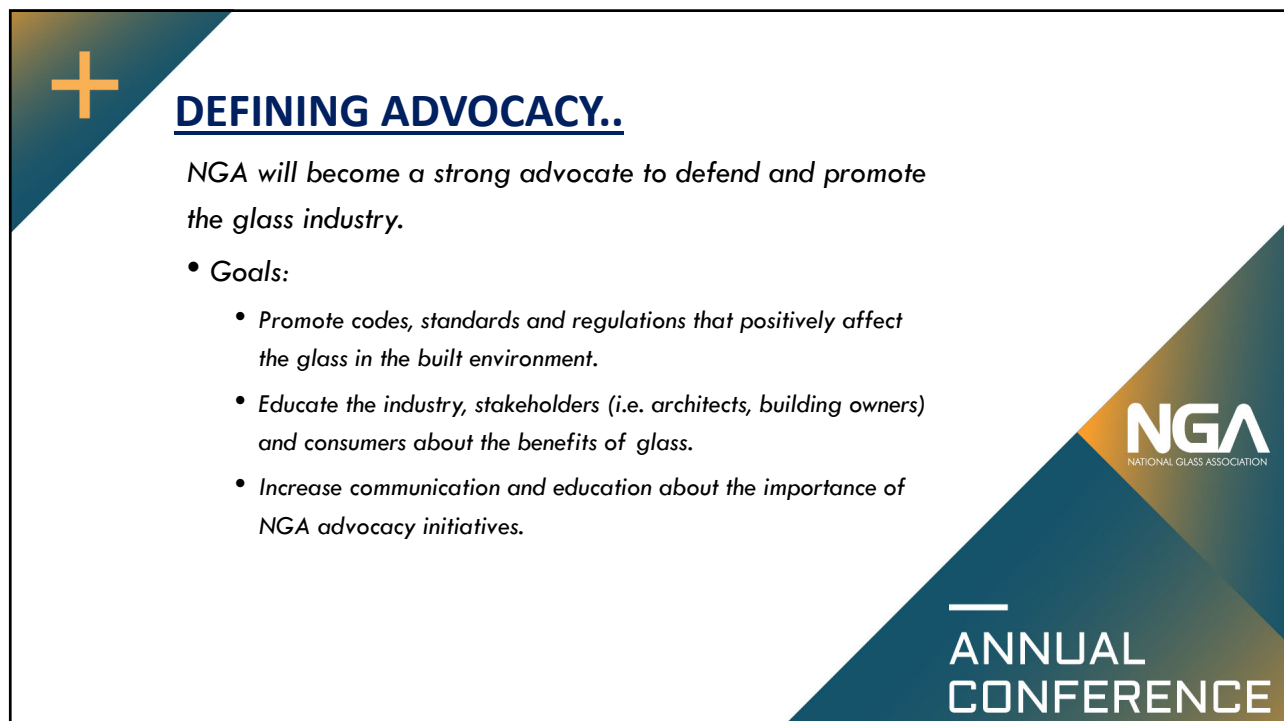

+

LEGISLATION AND REGULATIONS

6. An increase in third-party certification related to fabrication, installation and commissioning of whole buildings.
7. Continued federal oversight requirements, with an increase in those requirements from the Department of Transportation (DOT) and a change in Occupational Safety and Health Administration (OSHA) as it relates to silica.
8. Continued state oversight requirements, but it will be mixed depending on the state.
9. Either the same or a decrease in green building certification, but not in green attributes.

DEFINING ADVOCACY..

NGA will become a strong advocate to defend and promote the glass industry.

- **Goals:**
 - *Promote codes, standards and regulations that positively affect the glass in the built environment.*
 - *Educate the industry, stakeholders (i.e. architects, building owners) and consumers about the benefits of glass.*
 - *Increase communication and education about the importance of NGA advocacy initiatives.*
